

375 Kensington High Street, Kensington, London, United Kingdom

Project Background

High-end property developer, St Edward, has chosen Helvar to provide the lighting controls for its opulent collection of apartments and penthouses in the prime London location of Kensington.

Located in the heart of the Royal Borough of Kensington and Chelsea, in one of London's most prestigious postcodes, 375 Kensington High Street offers a selection of luxurious one, two and three bedroom apartments and penthouses.

Each home combines the finest quality materials with the highest levels of design and the latest innovations in technology to create the very best in modern city living. Residents enjoy a beautifully landscaped courtyard, inspired by London's traditional garden squares, a private cinema and a luxurious leisure suite, which includes a swimming pool, fitness studio with facilities for personal training, sauna, spa, showers and changing rooms. A state-of-the-art business suite, equipped with digital communications technology, enables residents to conduct business with global contacts at any time of day or night.

Helvar meets the needs

Using Helvar's latest DALI lighting control system, each apartment benefits from flexible lighting scenes at a touch of a button. The lighting control system is also integrated with the audio visual system within each luxurious apartment, providing residents with total control of their home technology.

Elegant flicker free dimming performance of 1 – 100% is guaranteed by using Helvar's latest range of DALI LED Drivers. This LED driver range is designed for easy installation, long lifetime, high efficiency and high immunity.

SOLUTIONS:

Integration with BMS system, easy installation, high efficiency
